Cocoanut Oil Fine For Washing Hair

If you want to keep your hair in Her Opera Debut

Most soaps and prepared shampoos contain too much alkali. This dries the scalp, makes the hair brittle, and is very harmful. Just plain mulsified cocoanut oil (which is pure and entirely greaseless) is much better than the most expensive soap or anything else you can use for shampooing, as this can't possibly injure the hair.

Doubtiess she was happy.

Miss Jardon has a fine stage presence, a lithe figure, ability to act, although she gesticulates too freely, and a thorough knowledge of stage routine. Her voice, naturally a good one, is marred by a distressing tremolo. That one could forgive in the first act, attributing the cause to nervousness, but the excuse did not hold after the more than genorous meed of approbation that was bestowed upon her. The tremolo did not abute to the end and there were moments when her voice took on a stridency that was unpleasant.

Simply moisten your hair with water and rub it in. One or two teams spoonfuls will make an abundance of rich, creamy lather, and cleanes the hair and scalp thoroughly. The lather ringes out easily, and removes every particle of dust, dirt, dandruff and excessive oil. The hair dries quickly and evenly, and it leaves it fine and silky, bright, fluffy and easy to manage.

You can get mulsified cocosnut oil at most any drug store. It is very cheap, and a few ounces is enough to last every one in the family for months.—Advt.
